

SS ONLINE LAUNCH & DIGITAL GROWTH PLAN

Offline Business → Permanent Digital Brand → Content → Organic Growth → Paid Ads → SEO

1. Purpose

This document is the execution plan for moving SS Home Service from an existing offline operation to a permanent online business presence. It is intentionally limited to the practical steps required to launch, build credibility, create content, acquire the first audience, test advertising and establish basic SEO.

The first two months are treated as a pilot period. The objective is not to build a large platform immediately; it is to establish the correct brand, digital assets, content system and customer-acquisition process.

2. Step 1 — Decide the Permanent Brand Name

The same public-facing name should be used across Facebook, Instagram, TikTok, WhatsApp Business, Gmail, website, domain, Google Business Profile and future app/platform.

Requirement	Rule
Keep	SS
Name style	Short, distinctive, easy to pronounce and type
Scope	Must work for car, microbus, bus, wedding/event, tour, passenger, truck, goods transport and shifting
Avoid	Names limited to 'Home Service', 'Moving' or 'Truck'
SEO	Brand name should be stable; service + location keywords belong in page titles/content
Before purchase	Check Bangladesh trademark/business records, Google exact-match results, domain and social handles

Working naming direction: use a structure such as “SS [Distinctive Brand Word]” + descriptor “Vehicle Rental • Transport • Travel”. A final name should only be adopted after the availability checks above. The web screening performed for this document does not establish worldwide trademark availability.

3. Step 2 — Create the Digital Identity

Order	Action	Output
1	Create/rename Facebook Page	Permanent Page name + username
2	Create Instagram	Same brand/username if available
3	Create TikTok	Same brand/username if available
4	Create official Gmail	Business communication account
5	Set up WhatsApp Business	Booking/inquiry number
6	Buy domain	Brand-based domain
7	Create Google Business Profile if eligible	Local search presence
8	Create website later/alongside	Central service information

Facebook Page access should be managed deliberately: Meta allows full-control and task-based access, so the founders should assign access rather than sharing one personal password. 穀cite學turn2search2學turn2search14倖

4. Step 3 — Page Setup Before the First Post

Item	What to Prepare
Profile image	Simple logo, readable at small size
Cover	Brand + core services + contact/booking CTA
Username	As close as possible to the permanent brand
Bio	Vehicle Rental • Transport • Travel • Shifting
Phone/WhatsApp	Dedicated business contact
Service list	Car, Microbus, Bus, Wedding, Tour, Truck, Pickup, Covered Van, Shifting
Location/service area	Actual area served
CTA	WhatsApp / Call / Message
Auto-reply	Basic inquiry response
Reviews/Recommendations	Keep enabled where appropriate
Page access	Assign founder roles

Meta provides Page messaging automations such as instant replies through Meta Business Suite.

穀cite學turn2search1像

5. Step 4 — Content System

Do not try to create a large amount of content before launch. Build a small reusable content bank first.

Content Type	Initial Quantity	Examples
Service graphics	5	Car, Microbus, Bus, Truck, Shifting
Service photos	5–10	Real vehicles/services
Short videos/Reels	3–5	Vehicle walkaround, service explanation, real work
Brand post	1	Who SS is / what it provides
Booking post	1	How to book
Trust post	1	Vehicle/driver/service process
FAQ post	1–2	Price, booking, timing, service area

6. Photography & Video — Minimum Setup

- Start with a good smartphone; a camera is not required for the pilot.
- Use daylight and clean backgrounds.
- Take wide, front, side, rear and interior shots of each available vehicle.
- Keep vehicle number plates and customer information private where necessary.
- Record vertical 9:16 video for Reels/short-form content.
- Capture real service footage with customer permission.
- Use Canva for graphics and CapCut or another simple editor for video.
- Create one master photo/video folder organised by service and vehicle.

Meta recommends mobile-first vertical creative for Reels; its current Reels guidance specifically discusses 9:16 video, audio and safe-zone placement. 穀cite學turn2search0像

7. Step 5 — First 2-Week Posting Plan

Week	Posts	Reels	Main Purpose
Week 1	3	2	Introduce SS + core services + real vehicles
Week 2	3	2–3	Explain booking + use cases + trust + service area

After Week 2: maintain roughly 3 posts + 2–3 Reels per week as a sustainable baseline. Increase only when you have useful real content.

8. Organic Growth — Before Spending on Ads

Method	Action
Personal network	Founders and existing business contacts share the launch
Local groups	Participate where transport/shifting/tour requests are relevant; follow group rules
WhatsApp	Use Status and direct business contacts appropriately
Cross-posting	Publish the same useful short video across Facebook, Instagram and TikTok
Reviews	Ask every genuine customer for a recommendation/review after service
Referral	Create a simple referral mechanism after the first real customers
Local content	Post service-area and use-case content
Consistency	Keep the same brand name, phone and service description everywhere

Do not buy followers. A smaller audience that produces inquiries, bookings and genuine recommendations is more useful for this service business.

9. Paid Promotion — Exact Pilot Structure

Paid advertising should begin only after the Page has basic information and several credible posts. The purpose of the first campaign is to learn, not to spend heavily.

Stage	Timing	Objective / Activity	Suggested Budget
Stage 0	Days 1–7	Organic launch; no or minimal paid spend	BDT 0–1,000
Stage 1	Days 8–14	Small Awareness/Engagement test for local reach and creative learning	BDT 1,000–2,000
Stage 2	Weeks 3–4	Test message/lead-focused campaign for actual inquiries	BDT 3,000–5,000
Stage 3	Month 2	Scale the campaign/service combinations that produce qualified inquiries	BDT 5,000–10,000+

Meta's available campaign objectives and interfaces can change. Choose the objective that matches the actual business outcome available in Ads Manager rather than selecting an objective simply to increase a vanity metric. Reels can be included as an ad placement, and Meta supports testing different creative approaches. 穀cite學turn2search0傢

10. What to Advertise First

Priority	Service to Test	Reason
1	Car / Microbus Rental	Broad household and travel use
2	Wedding / Event Transport	Clear seasonal/use-case demand
3	Tour / Group Transport	High-value group booking potential

4	Truck / Goods Transport	Business demand
5	House Shifting	Existing SS capability

Do not advertise every service equally on day one. Test a small number of service-specific creatives and compare qualified inquiries.

11. SEO — Start Basic, Not Advanced

SEO should start from the first day of the digital identity, but advanced SEO work is not required during the pilot.

Level	What to Do
Level 1 — Mandatory	Permanent brand name, consistent phone/name, Facebook username, domain
Level 2 — Local	Google Business Profile if eligible; accurate service area; services; hours; reviews
Level 3 — Website	Home + individual service pages + contact/booking + service area
Level 4 — Technical	Mobile-friendly site, HTTPS, indexable pages, Search Console, sitemap
Level 5 — Content	Useful pages targeting real service + location searches
Later	Backlinks, deeper technical SEO, structured data and larger content programme

Google states that service businesses can use Business Profiles when eligible, and service-area businesses should accurately represent their service area; the profile can include services, phone, website, hours and reviews.

穀cite學turn0search0學turn0search1學turn0search3像

Google Search Central provides the Search Essentials and SEO Starter Guide as the appropriate foundation for technical and content SEO. 穀cite學turn0search2像

12. Google Business Profile Setup

- Use the real business name consistently.
- Choose the most accurate primary category available.
- Add only genuine service areas.
- If customers do not visit a staffed business location, use the service-area setup and do not invent a virtual office.
- Add phone, website, hours and services.
- Add genuine photos.
- Ask real customers for reviews after completed jobs.

Google's current guidelines state that service-area businesses should accurately specify their service areas and normally use one profile for the central business location; virtual offices are not eligible simply as mailing addresses.

穀cite學turn0search0學turn0search3像

13. Website — When to Build It

Do not wait months, but do not build a complex platform before demand is proven.

Stage	Website Scope
Pilot	Simple landing site or basic website
Required pages	Home, Services, About, Service Area, Reviews, Contact/Book
Service pages	Car, Microbus, Bus, Wedding/Event, Tour, Truck/Goods, Shifting
Booking	WhatsApp + phone + simple form
Later	Online booking, partner database, automated quotations, customer accounts
Much later	Custom app/platform

14. Tools & Basic Cost Planning

Item	Use	Planning Basis
ChatGPT Plus	Planning, copy, research, content workflow	US\$20/month official list price
Canva Pro	Logo/content/design	Already available; no new cost if active
CapCut	Video editing	Free initially; upgrade only if needed
Meta Business Suite	Page/content/inbox management	No separate subscription
WhatsApp Business	Customer communication	No separate app subscription
Domain	Permanent web identity	Budget roughly BDT 1,500–4,000/year; verify provider price
Basic hosting	Website	Budget roughly BDT 3,000–10,000/year; verify provider price
Meta Ads	Customer acquisition	Pilot BDT 5,000–10,000 total/month

ChatGPT Plus is currently listed by OpenAI at US\$20/month. 穀cite學turn0search1像 Domain, hosting and advertising prices are variable; use the actual checkout/quote when making the founders' final budget.

15. Pilot Budget — First 2 Months

Category	Month 1	Month 2
Brand/logo/basic creative	BDT 1,000–3,000	BDT 0–1,000
Domain/hosting	BDT 2,000–7,000	BDT 0–1,000
Content/photo/video	BDT 0–3,000	BDT 0–3,000
Meta Ads	BDT 3,000–5,000	BDT 5,000–10,000
ChatGPT Plus	US\$20/month	US\$20/month
Canva Pro	Existing	Existing
CapCut Pro	Not required	Optional
Estimated cash spend excluding subscriptions	~BDT 6,000–18,000	~BDT 5,000–15,000

This is a planning range, not a guaranteed market cost. The aim is to validate the model with a controlled budget before increasing spending.

16. What Success Looks Like After 60 Days

Area	Target Evidence
Brand	One permanent name used consistently
Digital assets	Page + Instagram + TikTok + WhatsApp + Gmail + domain
Content	20–30 useful pieces published
Audience	Organic local audience and real engagement
Leads	Regular qualified inquiries
Customers	First completed online-generated bookings
Reviews	Real customer recommendations/reviews
Ads	At least one tested campaign with measurable inquiry results
SEO	Google Business Profile/website foundation completed where eligible
Decision	Clear evidence of which services should receive more budget

17. Final Execution Checklist

Step	Status
Permanent SS brand name selected	☐
Trademark/business-name/domain/social screening completed	☐
Facebook Page created	☐
Instagram created	☐

TikTok created	☐
Gmail created	☐
WhatsApp Business configured	☐
Logo + profile + cover completed	☐
Service catalogue completed	☐
Vehicle photo/video bank completed	☐
First 10–15 content assets completed	☐
Organic launch completed	☐
Google Business Profile checked/created if eligible	☐
Website/domain completed	☐
First Awareness/Engagement test completed	☐
First inquiry-focused campaign completed	☐
60-day performance review completed	☐

18. Decision for the Founders

The immediate decision is not how large SS should become. The immediate decision is whether the three founders can execute the same digital identity consistently for 60 days.

Decision	Final Entry
Permanent SS Brand Name	_____
Username / Handle	_____
Domain	_____
Primary Launch Area	_____
Initial Services to Advertise	_____
Month-1 Content Owner	_____
Month-1 Ad Budget	_____
Website Target Date	_____
Google Business Profile Owner	_____
60-Day Review Date	_____
